

LARGE AG PRIORITY SERVICE PROGRAM

**HELPING YOU GET MORE OF A
RETURN ON YOUR INVESTMENT**

21st Century Equipment is committed to reducing risk,
increasing productivity and improving profitability.

PROGRAM OVERVIEW

Our program starts with a dealer-performed technical inspection. From this thorough inspection, we prioritize any problems into one of three categories:

- **Requires immediate repair**
- **Should be repaired in the next 12 months**
- **Will not affect the performance of your machine this season**

Next, we review the finding and you select which program works best for you:

PRIORITY PROGRAM

Based on the review, you decide which repairs should be completed. This program identifies the state of your machine and allows you to repair only what you feel is necessary.

The Priority Service Program includes all John Deere agricultural equipment.

PRIORITY™ PLUS PROGRAM

By repairing areas based on dealer findings, this program provides real peace of mind, knowing the equipment is covered during the first season of use. Includes full-service call and trucking coverage and one-year warranty on all repairs performed in the least amount of downtime possible.

PRIORITY GUARANTEE

The Priority Service Inspection Program offers one-year parts and service warranty on all dealer-installed John Deere parts. 21st Century Equipment's PRIORITY GUARANTEE will provide for those machines that complete both categories of our Priority™ Plus Program, the highest priority available, including free mileage on service calls.

Ask your 21st Century Equipment representative about pricing. Other features of our inspection include:

- FREE trucking
- Machine Wash
- FREE horsepower check on all PTO-equipped tractors
- Engine oil scan, fluid sample testing of antifreeze and hydraulic fluids are provided in all inspections

*Offer valid 10-1-23 through 1-31-24. Some restrictions apply, see dealer for details.

**CALL YOUR DEALERSHIP TO
ENROLL OR SIGN UP AT
21STCENTRUYEQUIPMENT.COM**

The completion of repairs in categories A and B also provides extended coverage that will eliminate any service call mileage or hauling charges regardless of the repairs required throughout the season of use.
